***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U. S. Patent #6,785,026, U. S. Patent Publication #2004/0016797, U. S. Patent Publication #2003/0189736, and U. S. Patent Publication #2003/0132281 are cited for showing currency processors recognizing color.

***Allowable Subject Matter***

Claims 1-19 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art fails to teach or suggest the selective driving of differently colored light sources based on currency denomination information used to read a serial number on a bill as more completely pointed out in the claims. Terajima and Ikeda teach the selective driving of different colored lights in an image reading system, but do not teach the driving of the lights based on currency denomination information. The Jones patents teach the reading of serial numbers on bills, but do not teach the selective driving of differently colored lights based on denomination information.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
